AgriNXT helps the farmers to regulate their farmland through their mobile. AgriNXT by Crisp Cloud Solutions caters solutions for farmlands and farmers. It's a first-of-its-kind agri product that doesn't require working internet connection. It gives the user the potential to administer their farmland from the comfort of their house. AgriNXT can be run by people even without basic educational qualification, due to its simplicity and integrity.

AgriNXT is made possible through GSM technology that transmits mobile text services, voice, and data services for its efficient operation. The products also have other capabilities such as cyclic timer, monitoring

WATER SOURCE

- ➔ Rust proof
- ➔ Compact size
- ➔ Easy to use
- ➔ Internet
- ➔ Cloud
- ➔ Mobile

Crisp Agri Automation was born to find solutions to such problems. We build Irrigation Controller / Drip Controller Systems which help farmers to overcome these problems.
